### **DETAILED ACTION**

1. This action is in response to application 10/733,168 filed December 11, 2003.

Claims 1-3 are pending in the application.

### ***Election/Restrictions***

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claim 1, drawn to a concept classifier, classified in class 704, subclass 1.
- II. Claim 2, drawn to a grammar rule derivation system, classified in class 704, subclass 9.
- III. Claim 3, drawn to a recognition system with natural language processing, classified in class 704, subclass 259.

3. Inventions III, I and II are related as combination and subcombinations.

Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombinations as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombinations as claimed because it does not specify how the grammar rules are determined, nor how the concepts are classified.

The subcombinations have separate utility such as a concept classifier and a grammar rule deriver.

The examiner has required restriction between combination and subcombination inventions. Where applicant elects a subcombination, and claims thereto are subsequently found allowable, any claim(s) depending from or otherwise requiring all the limitations of the allowable subcombination will be examined for patentability in accordance with 37 CFR 1.104. See MPEP § 821.04(a). Applicant is advised that if any claim presented in a continuation or divisional application is anticipated by, or includes all the limitations of, a claim that is allowable in the present application, such claim may be subject to provisional statutory and/or nonstatutory double patenting rejections over the claims of the instant application.
